01 PROJECTS

Villeroy & Boch works with architects, planners and interior designers during and after the project – from the first draft to the final version. The modular PROJECTS system from Villeroy & Boch offers collections and products for individual project requirements with clear segmentation in terms of pricing and subject matter.

Project segments:

Hotel & Restaurant

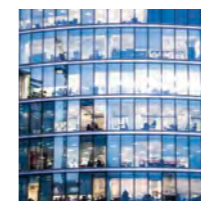

Sport & Culture

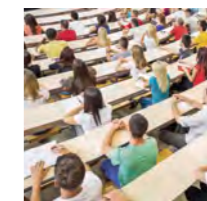

Housing

Health & Healthcare

Office & Commerce

Public sector & Education

Price segments:

Premium & Luxury

Collections for the most discerning requirements

Design & Lifestyle

Design variety for every project

System & Function

The modular concept for different projects

Entry level & Broad product range

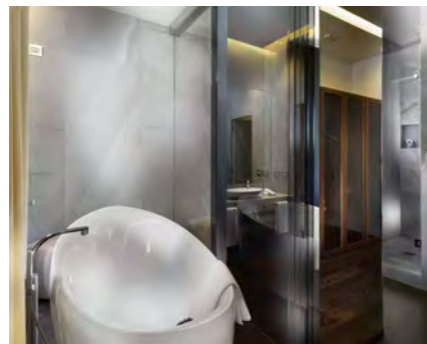

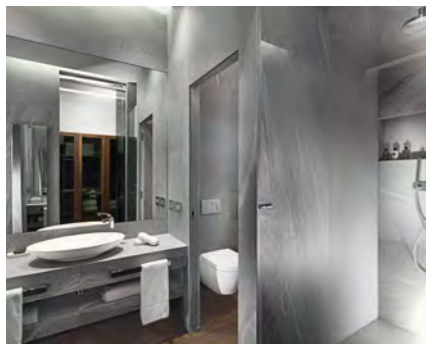

The attractive entry-level price segment for every project requirement

7 Stars Galleria Boutique Hotel, Milan

A modern spirit thrives within an historic architectural masterpiece

Located inside the world famous Galleria Vittorio Emanuele II in Milan, the 7 Stars Galleria by Massimo Magaldi Architetto is renowned as the world's first seven star hotel. Nearly all of the hotel's guestrooms and suites are appointed with large windows and balconies and offer direct views of the Galleria's dome, historical frescoes and stunning mosaic floors. Magaldi has used plain colours, materials and fittings and minimalist furnishings in the guestrooms and suites to conjure up a serene atmosphere of wellbeing which does justice to the spiritual nature of this historic building. The washbasins from the Loop & Friends collection and the free-standing Aveo New Generation baths in particular emphasise the ambience of luxury and refined elegance.

Faralda NDSM Crane Hotel, Amsterdam

Industrial monument with
wellness area

The Faralda NDSM Crane Hotel in Amsterdam is as unusual as a hotel can be. The listed crane in the former shipyard was innovatively restored on the basis of an idea by the owner and project designer Edwin Kornmann Rudi in co-operation with IAA Architecten in Amsterdam and the engineers from VDNDP bouwingenieurs and now houses three luxury suites. The elegant designer bathrooms include products from various Villeroy&Boch bathroom collections. On the upper terrace there is even a SportX-Line hot tub – all at the dizzying height of 35 to 45 metres.

Project name:	Faralda NDSM Crane Hotel
Location:	Amsterdam, The Netherlands
Completion:	2013

Prestige Hotel, Budapest

Bourgeois elegance blends with modern design

The Classicist building with a listed façade from 1860 has a chequered past and has undergone numerous structural modifications throughout its history. Originally the residence of the celebrated Hungarian architect József Hild, the building in the centre of Budapest was used for a variety of purposes before the hotelier Mazen Al Ramahi converted it into a four-star superior hotel in 2015. Thanks to the work of a large team of architects and interior designers, the Prestige Hotel Budapest presents an accomplished blend of contemporary design and stylistic elements from the era of the Austro-Hungarian Empire. The result is a charming retro flair, transporting the splendour of the past into the bustling world of modern-day Budapest. This charm is also reflected in the high-quality bathrooms in the hotel's 85 rooms covering various categories, where purist sanitary ceramics from Villeroy & Boch's Architectura collection complement the combination of modernity, elegance, carefully chosen materials and ornamentation.

Project name:	Prestige Hotel Budapest
Location:	Budapest, Hungary
Completion:	2015
Developer:	Mazen Al Ramahi, hotelier
Construction project:	Conversion of a Classicist office building into a four-star superior hotel with 85 rooms, bathroom furnishings
Architects:	Originally built c. 1860: József Hild Conversion 2014: Péter Hegedűs, Ágnes Bolyó
Interior designers:	Virág Vörös, Csilla Sáfrány, Tünde Bagyinszkiné Kiss
Products:	Architectura toilets, washbasins and accessible toilets

W Beijing Chang'an, Beijing

Innovative design hotel
for a young target group

Located close to world-famous sights like the Forbidden City or Tiananmen Square, the W Beijing Chang'an Hotel is hip, loud, colourful and high quality. The 349-room designer hotel by the international architects RTKL is coupled with an original and striking interior from AB Concept from Hong Kong to produce a dynamic overall concept combining design, art and music for its trend-loving guests. The hotel is remarkable for its spectacular installations, lively colours, unusual materials and the dynamic lighting concept. The public toilets also have high-grade surfaces, coloured marble, refined mirror effects and modern sanitary ceramics from the Architectura, Subway and Loop & Friends collections.

Project name:	W Beijing Chang'an

44 Floors, De Rotterdam, Rotterdam

Exclusive homes in Holland's largest multifunctional building

The "44 Floors" in Rotterdam is the west residential tower in the "De Rotterdam" complex which was completed at the end of 2013. The multifunctional building at Wilhelminapier was designed by OMA as a vertical community, combining offices, catering outlets, a hotel, leisure amenities, parking facilities and apartments on 160,000 m² of floor space. With its three glazed towers, it is a real eye-catcher at the port of Rotterdam. The 240 high-quality apartments and penthouses at the "44 Floors" feature floor-to-ceiling windows affording outstanding views of the port area and the city. They appeal to a modern, urbane clientele who attach importance to comfort and a luxurious lifestyle. The bathrooms befittingly feature sanitary items from Villeroy & Boch's Subway 2.0 and Subway collections.

Lufthansa Lounge, Milan Malpensa

A delightful retreat

Aperitivo, fresh pasta, espresso served by a barista – since January 2018, the Lufthansa Lounge at Milan Malpensa airport has been celebrating the city's typical culinary delights. A new lounge concept has been realised over an area of more than 500 m², offering first-class service in a congenial home-from-home setting rounded off by an impressive windowed front affording an exclusive view of the terminal manoeuvring area. The focus is on providing guests with the ultimate in comfort. They have various options for creating their own private space and taking some time out from the hustle and bustle of travel. As a "Partner of Lufthansa", Villeroy&Boch has designed the sanitary area with high-quality ceramics in keeping with the lounge concept, including items from the Artis, Architectura and Subway 2.0 collections and tiles. Guests enjoy perfect comfort in a stylish setting in which contemporary bathroom architecture contrasts interestingly with features citing the city's history.

Project name:	Lufthansa Lounge, Milan Malpensa
Location:	Milan Malpensa Airport, Italy
Completion:	January 2018

Westin Hamburg – Elbphilharmonie, Hamburg

Landmark with a view

The Elbphilharmonie designed by Herzog & de Meuron in Hamburg is unanimously regarded in architectural circles as a masterpiece. The quality of the building is not only in evidence on the outside. The transparent facade conjures up special moments inside, too. The panoramic bathrooms of the Westin Hotel in particular offer unparalleled views of the busy port, courtesy of windows extending down to the floor. Interior designer Tassilo Bost's stringent concept combines the counterpoints of openness and seclusion in spectacular fashion. The bathrooms are ideally positioned directly at the facade, providing guests with a special experience while at the same time meeting their desire for privacy. Villeroy&Boch underscores this radical bathroom concept with products from the Architectura and Loop & Friends collections.

Project name:	Elbphilharmonie
Location:	Hamburg, Germany
Completion:	2016
Developer:	Elbphilharmonie Bau KG
Architects:	Herzog & de Meuron
Interior designer:	Tassilo Bost
Products:	Architectura toilets Loop & Friends washbasins

Bolshoy Ice Dome, Sochi

Sanitary concept for 12,000 people

One of the challenges in the planning of sites for large events is to integrate innovative architecture in order to attract tourists and to turn the site into a prestige object for the city or sports club concerned. One example is the Bolshoy Ice Dome in Sochi which was designed by the Mostovik architect's office for the 2014 Winter Olympics. Of even greater importance in stadium are an optimised infrastructure and reliable supply system. This includes service functions like public toilets. Around 1,000 sanitary ware products from the O.novo, Subway and Architectura collections from Villeroy & Boch were used in the Bolshoy Ice Dome.

Project name:	Bolshoy Ice Dome
Location:	Sochi, Russia
Completion:	2012
Developer:	SC Olympstroy
Architect:	MC Mostovik architectural office

Engineers:	Andrey Ustinov, Andrey Veter
Capacity:	12,000 seats
Site area:	18,534 m ²
Usable space:	54,870 m ²
Products:	O.novo toilets and washbasins Subway urinals and washbasins Architectura toilets and washbasins

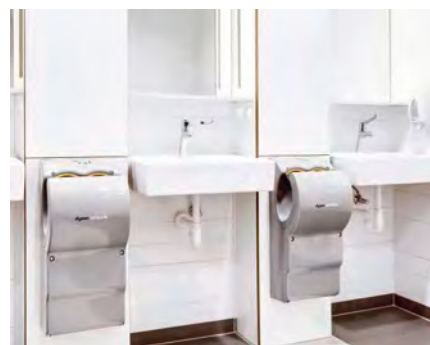

University Medical Center Groningen, UMCG

Highest hygiene demands for hospitals

The University Medical Center Groningen, or UMCG, has always played a leading role in the development of hospital architecture. The complex has a very long history dating back to the eighteenth century. Since then both the medical services and building structure have been continuously enlarged. In addition to the major architectural and urban development renewal, it is smaller changes, such as the modernisation of the toilet areas, which ensure that the building meets the highest hygiene and cleanliness requirements. Since 2014, Interieurarchitectuur Hart and Royal HaskoningDHV from Groningen have been replacing all 2,000 toilets in the original building with innovative sanitary ware products from Villeroy & Boch that satisfy the highest hygiene demands.

Project name:	University Medical Center Groningen
Location:	Groningen, The Netherlands
Completion:	Renovation of toilet facilities since 2014
Developer:	University Medical Center Groningen

Waldorf nursery school Ennepetal-Voerde, Ennepetal

Natural building materials to foster young children's creativity

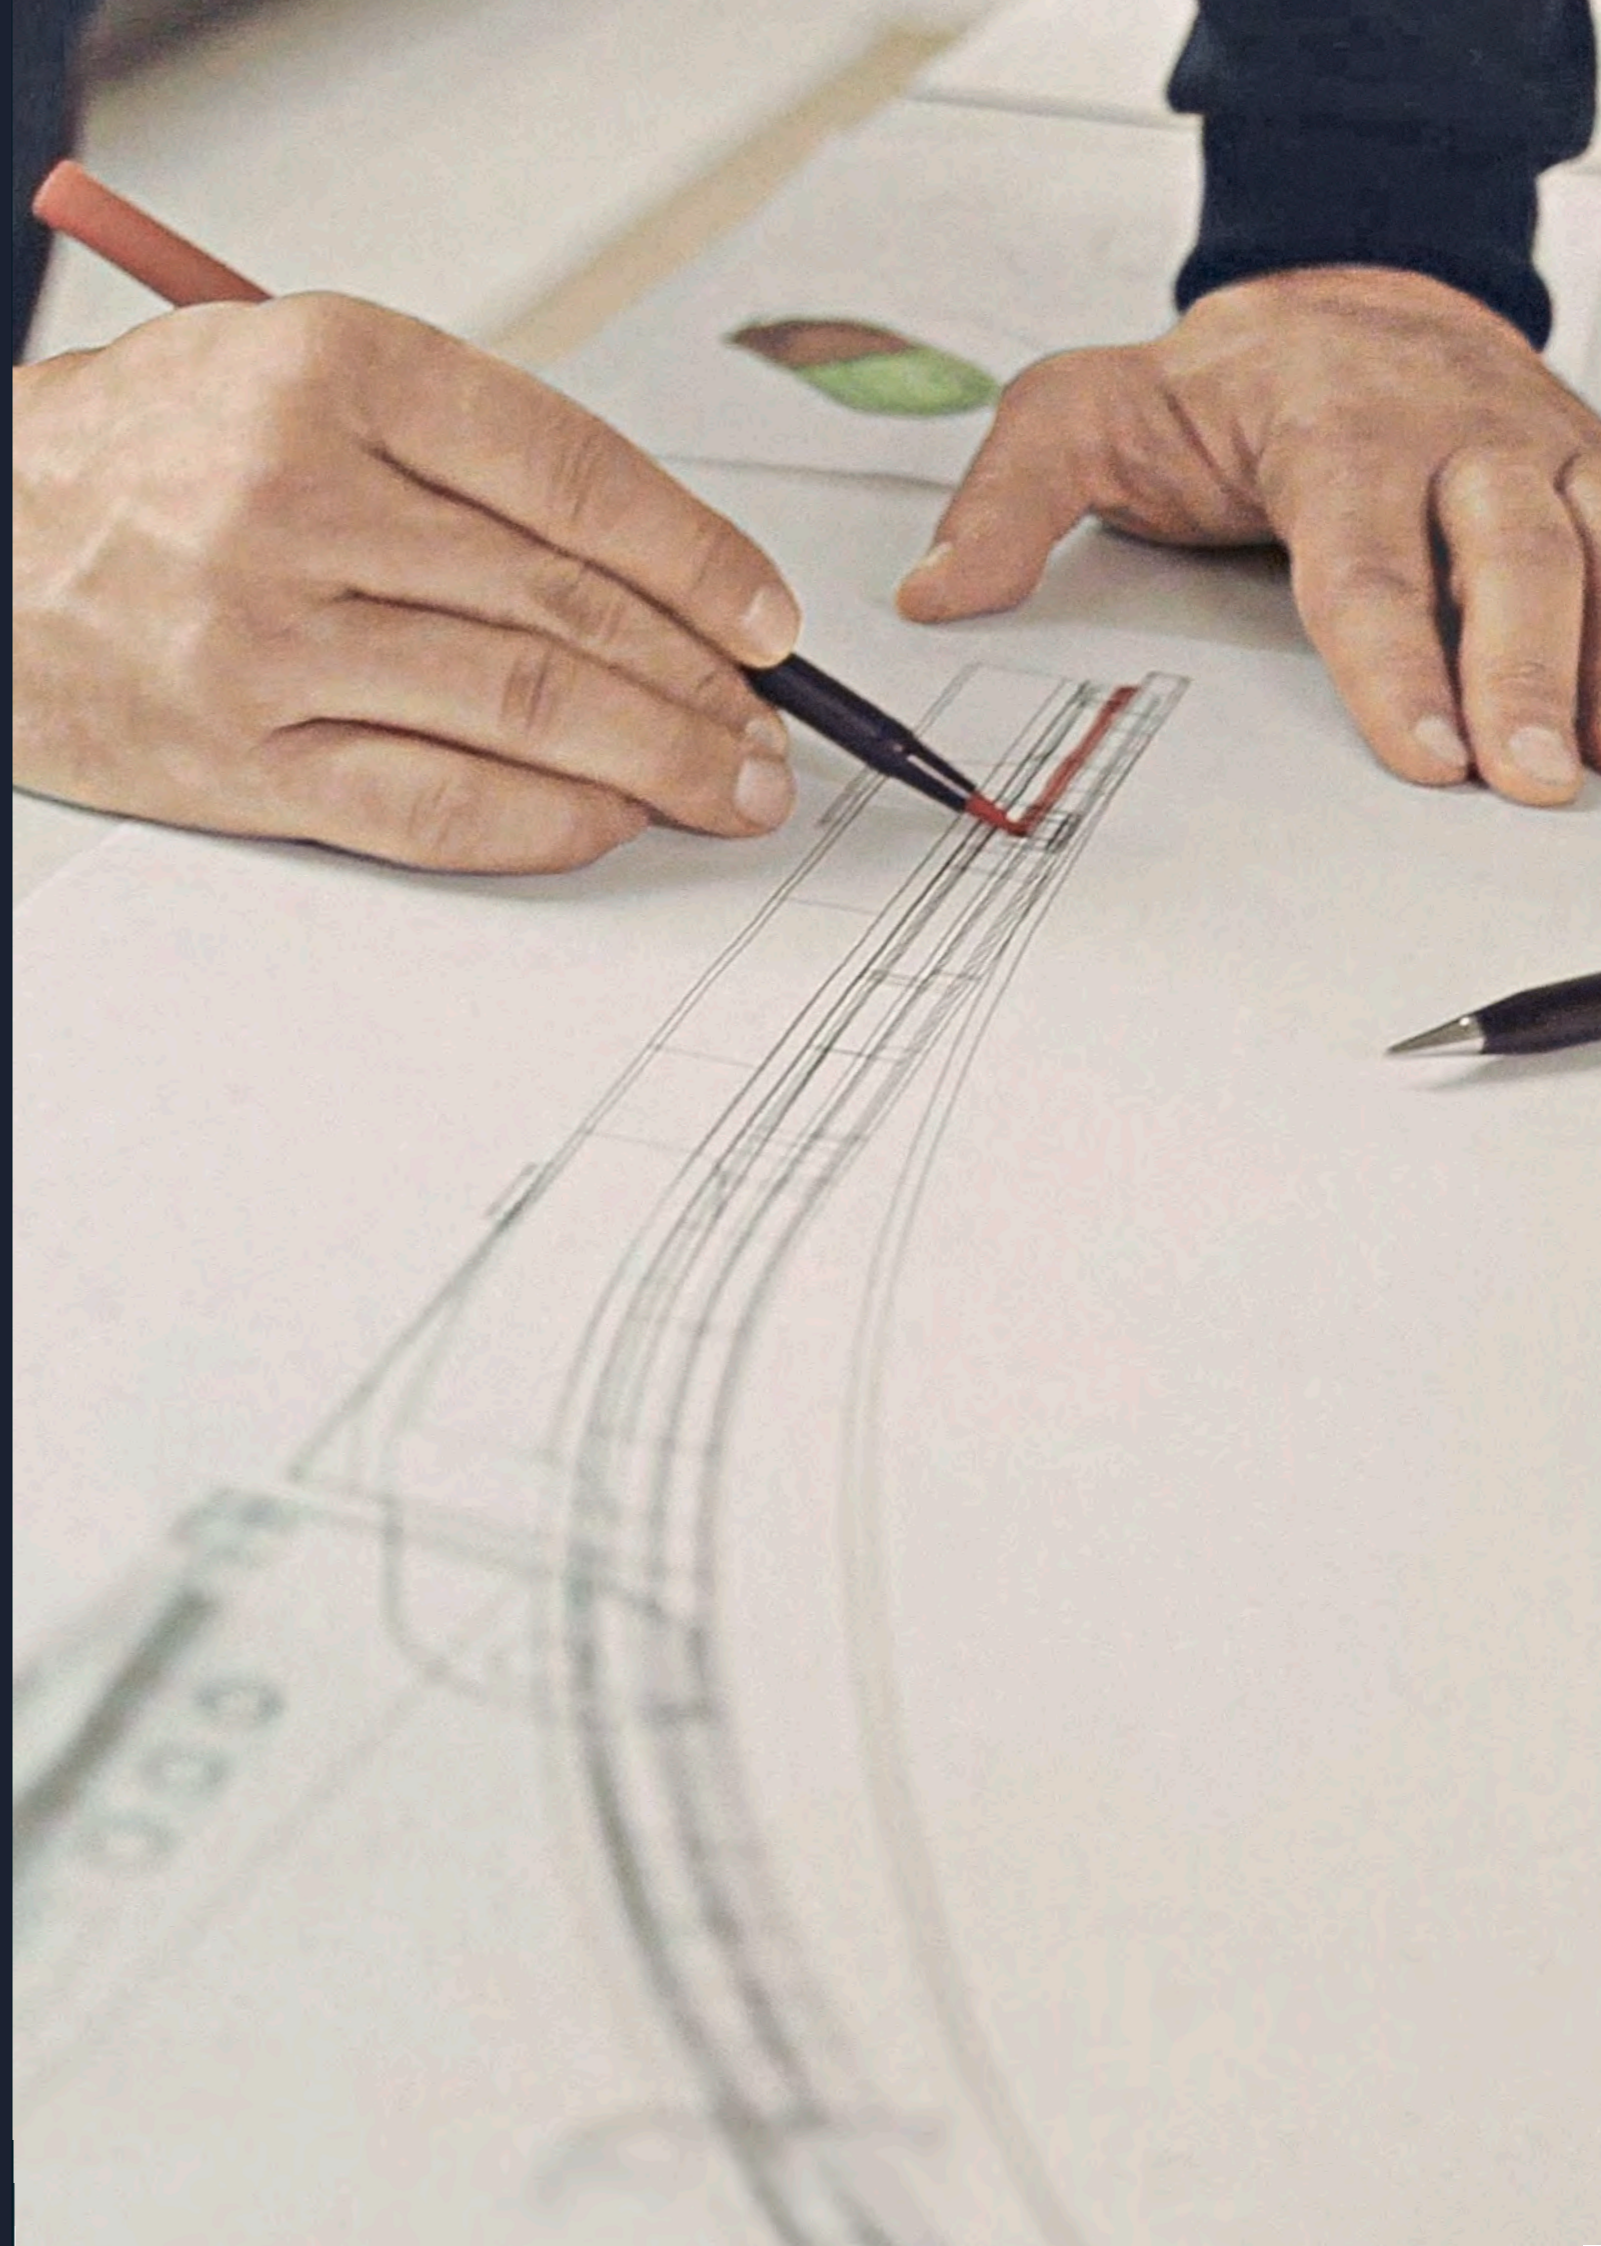

Sustainable, economical and above all a building for children. These were the requirements specified in the town of Ennepetal's invitation for tenders to build the new nursery schools. The concept submitted by Soest-based developer Materio under managing director Johannes Berger won the contract to build the new nurseries. Thanks also to the expertise of architecture firm RSA – Rinsdorf Ströcker Architekten, the shell of the building was completed as a wooden post-and-beam construction in the space of 2 weeks. The total floor area of around 715 m² accommodates 4 groups with a total of 75 places per nursery. The child-friendly design of the O.novo Kids bathroom range from Villeroy & Boch supports the educational concept of pre-school "self-learning", with all elements suitable for use by children of any age without assistance.

Project name:	Waldorf nursery school Ennepetal-Voerde
Location:	Ennepetal-Voerde, Germany
Completion:	2017
General contractor:	Materio Holzbau GmbH, Johannes Berger
Architect:	RSA – Rinsdorf Ströcker Architekten GmbH
Usable space:	715 m ² (75 children in 4 groups)
Products:	O.novo Kids bathroom range

Expertise

European cultural history

Made in Mettlach

When François Boch founded a small ceramics business in Audun-le-Tiche in Lorraine in 1748, he could scarcely have imagined that his company would one day help to shape European cultural and industrial history. Since then, the company has not only influenced tableware, bathroom and living styles but also developed significant products and production processes and, in addition, helped to democratise hygiene. A fine instinct for innovation and aesthetics and numerous collaborations with architects and designers provide the basis for new developments which will continue to shape bathroom culture in the future.

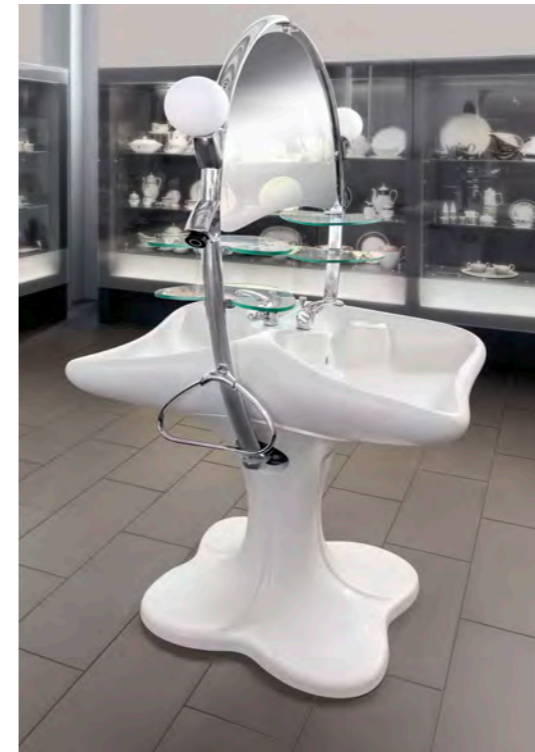

The Old Abbey

1809. After its closure, Jean-François Boch took over the old Benedictine abbey in Mettlach on the Saar. He built a modern tableware factory, opening up the way for industrial ceramic production. The headquarters of Villeroy & Boch is still to be found in the baroque building today.

Vincent van Gogh

1888. Van Gogh painted a portrait of his close friend Eugène Boch entitled "The Poet". The neo-impressionists Anna and Eugène Boch were actively involved in the art scene and had close contact to major artists such as Toulouse-Lautrec and Ensor.

Luigi Colani

1975. Colani created a completely new bathroom concept for Villeroy & Boch, defining the bathroom for the first time as a living area. In the years that followed, this new approach was to exert a major influence on the entire industry.

Luxury enters the bathroom

2017. The Octagon pedestal washbasin and the Squaro Prestige bath were transformed into exclusive, hand-crafted masterpieces featuring more than 6,000 Swarovski crystals, based on designs by Hong Kong star architect Steve Leung.

Architecture

Part of corporate culture

Deeply rooted in architecture and art, Villeroy&Boch has always attached importance to high-quality design and aesthetics. This is demonstrated by the company's close collaboration with leading architects of their day, who have applied the company's expertise to realise their design ideas in ceramic products, and is equally evidenced by renowned partners such as Marcel Wanders, Roberto Capucci, Sebastian Conran, Luigi Colani, Frog Design or Steve Leung. The results of this mutual inspiration can be witnessed in renowned buildings all over the world.

Schinkel Fountain

1833. Karl Friedrich Schinkel designed a two-bowl cast iron fountain for the grounds of the Old Abbey in Mettlach – a gift from the Crown Prince Frederick William of Prussia to Jean-François Boch. Not far from it is the Old Tower, the oldest sacred building in the Saarland.

Cologne Cathedral

1890. Villeroy & Boch created a 1,300 m² floor mosaic for Cologne Cathedral.

Holland Tunnel

1920. Villeroy & Boch completed a major project, fitting out the Holland Tunnel connecting New York City and New Jersey with 10,000 m² of tiles – it can still be seen today.

Radisson Royal Hotel Moscow

2010. Following extensive renovation and upgrading to luxury standard, this legendary building from the 1950s shines in new splendour as a revival of the stately architecture of times past. Befittingly, the exclusive bathroom fixtures and furnishings come from Villeroy & Boch.

Golden Mile, Palm Jumeirah

2010. A superlative development off the coast of Dubai. Villeroy & Boch fitted out the luxury apartments and hotels along the Golden Mile with more than 20,000 sanitary products.

Elbphilharmonie Hamburg

2016. Hamburg has a new landmark: the Elbphilharmonie, a magnificent work of art combining architecture, the location and music. Elegant, high-quality ceramic sanitary ware from Villeroy & Boch underscores the exceptional bathroom concept of the Westin Hotel.

Ceramics

Clay, kaolin, feldspar, quartz
and 270 years of experience

Ceramics have always been the defining feature of the Villeroy & Boch story. The material has been re-interpreted over and over and continuously developed by the company: with a devotion to craftsmanship; with the latest production methods; and with an eye for details. Every year, new and exceptional ceramic products of the highest quality and durability are manufactured. One thing has remained unchanged, however: a fascination for a natural product that never ceases to amaze.

Special features of Villeroy & Boch ceramics:

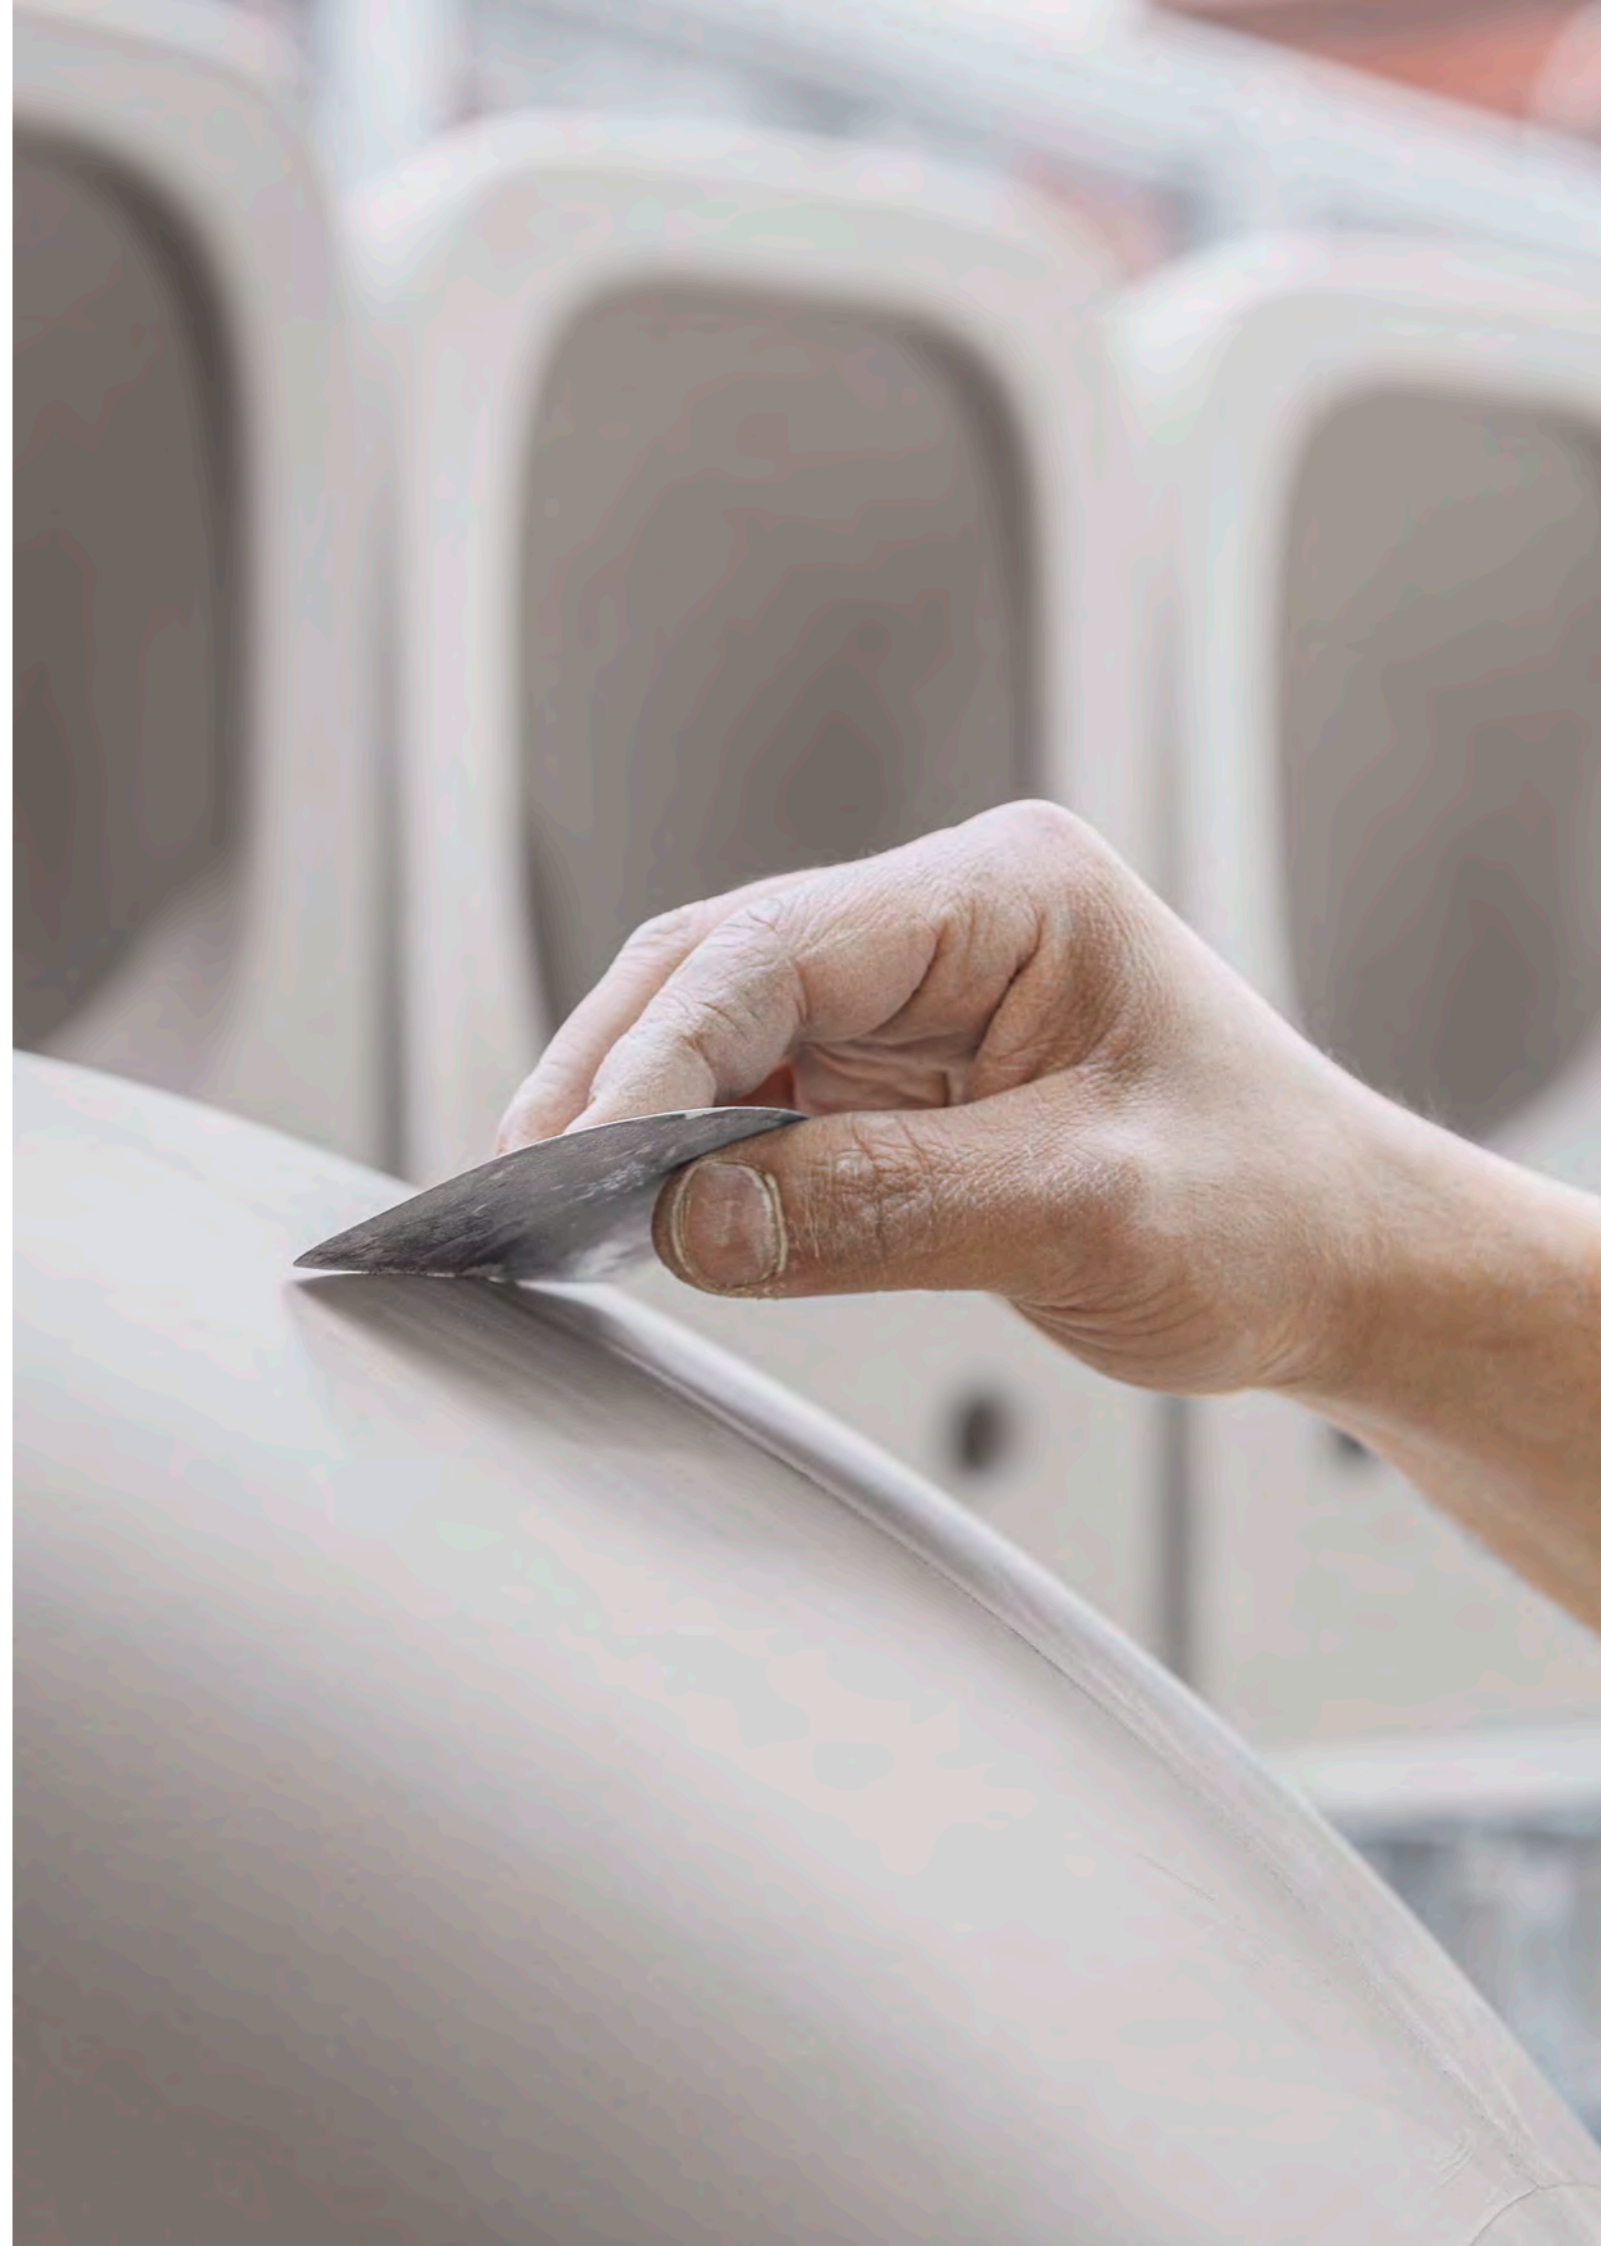

- Consistently high quality with over 25 control instances – from initial inspection of the raw materials to the final approval of the finished product
- Brilliant and highly-resistant surface thanks to the specially-prepared extra-thick glazing
- Breaking strength of up to 800 kg (wall-mounted toilets are required to have 400 kg)
- Colour competence: 18 of the 19 colours used as masters by the ceramic industry association were developed by Villeroy & Boch

Precision machines help workers and contribute to the consistently high quality of the products.

The glazed blanks are placed for approx. 16 hours in furnaces heated to as much as 1,200 °C to produce the finished product.

TitanCeram

The ceramic material for precise forms

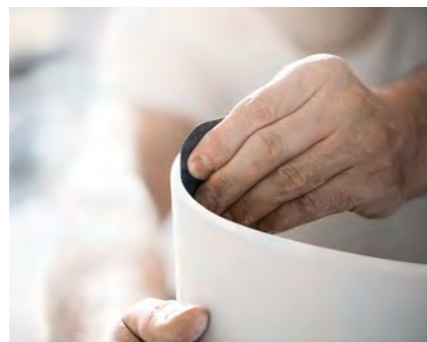

Firmer. Finer. And perfectly formed. Villeroy & Boch fuses natural raw materials such as feldspar, quartz, clay and titanium dioxide to create a material with the properties of top-class ceramics paired with great strength: TitanCeram. The advantages for shaping are a key source of inspiration for bathroom design. TitanCeram permits accurate bathroom ceramics, with delicate shapes and sharply defined edges, that are particularly stable and robust. Ideal for highly exclusive bathrooms.

Special features of TitanCeram:

- Precise design with extremely thin walls and sharply defined edges
- Great product stability thanks to an innovative material and a special production process
- Brilliant, highly-resistant surface thanks to the specially-prepared glazing
- Outstanding product quality thanks to strict quality assurance
- Great choice of colours: the TitanCeram washbasins are available in all Villeroy & Boch ceramic colours

The material passes through several filtration processes.

Perfecting the blank before glazing.

Quaryl®

As tough as quartz, and proving its worth for 25 years

Quaryl® from Villeroy & Boch is a unique material. It enables precise designs and is also highly robust and durable. An exclusive material consisting of 60% quartz and high-quality sanitary acrylic which can be cast with precision, resulting in delicate, dimensionally stable products with exact edges and tight radii which enable flush fitting. Perfect for durable and customised solutions in project business.

Special features of Quaryl®:

- Precise radii and edges with low tolerances and material thicknesses of 8 – 18 mm
- Squaro Infinity shower trays that can be cut to size with millimetre accuracy
- Skin-friendly surface that is pleasant to the touch
- Sound-absorbent and heat-insulating, slip-resistant and particularly robust
- 10-year guarantee on all Quaryl® products
- 35 quality controls from the raw material to the finished product
- Lighter yet more stable and robust than other cast mineral materials

Quaryl® permits highly precise forms.

Squaro Infinity Quaryl® shower trays can be tailor-made and cut to size as required.

Acrylic

More design flexibility and highest quality

Villeroy & Boch acrylic products offer architects extreme planning and design flexibility. Designed specifically for high-end bathrooms, Villeroy & Boch acrylic has long been acclaimed for its durability and high quality, allowing great product variety, a perfect appearance and a high degree of functionality. The processing of first-class raw materials and the use of the latest production and testing procedures make for products of the utmost reliability for project business.

Special features of Villeroy & Boch acrylic baths and shower trays:

- Perfect product quality with thicknesses of 3.6 – 4 mm
- Highest quality guarantee – every product is individually checked
- 10-year guarantee on shower trays and baths
- Smooth, pore-free surfaces which are easy to repair
- All products are made in Europe

The acrylic sheets are heated and vacuum-drawn into the mould. Once cooled, the moulded object is then precisely ground and polished.

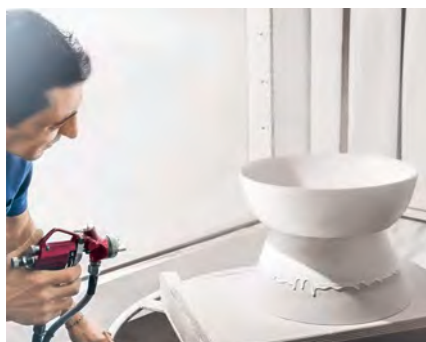

TitanGlaze

Matt. Beautiful. Stronger.

This new glaze combines crucial benefits: its modern matt look conjures up a special aesthetic appeal and is also particularly durable. Thanks to ultra-pure, crystalline aluminium oxide, TitanGlaze provides the ceramics with a high-quality finish that is particularly scratch- and impact-resistant. The products retain their unique appearance even when subjected to rough use – and keep looking as immaculate as on day one for many years.

Special features of TitanGlaze:

- Modern surface finish with ceramic glaze in matt look
- Enhanced robustness – above-average results in diamond scratching and falling ball test
- Broad range of ceramic products in the mainstream and premium segments
- Available in new matt colour Stone White
- Ideally combinable with wellness products in Stone White

TitanGlaze enhances the ceramics' impact and scratch resistance.

Its particular robustness has been demonstrated by the falling ball test.

Sustainability

Environmental protection is second nature to Villeroy & Boch

Environmental protection is self-evident for Villeroy & Boch, and all the relevant processes are controlled and linked worldwide by a central environment management unit with a view to developing innovative production processes and solutions, making more efficient use of energy and raw materials, reducing emissions and extending the service life of products – well beyond the levels set by laws and regulations.

Villeroy & Boch environmental activities:

- Continual reduction of waste water at all plants
- 40% reduction in CO₂ emissions in Mettlach since 2005
- EMAS (Eco Management and Audit Scheme) validation
- One of the first ceramics manufacturers worldwide to be awarded ISO 9001 certification
- Certification in accordance with international environmental management standard ISO 14001 and energy management standard DIN EN ISO 50001
- Quality assurance in accordance with REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) regulation
- Member of the German Sustainable Building Council, DGNB e.V.
- Member of the USGBC (U.S. Green Building Council) and LEED (Leadership in Energy and Environmental Design) Rating System
- Registered member of the European Water Label Scheme

EMAS (Eco Management and Audit Scheme) validation.

Member of

Certification system of the German Sustainable Building Council (DGNB) for objective specification and assessment of the sustainability of buildings and urban developments.

USGBC/LEED assessment system for the environment-friendliness and energy efficiency of buildings.

European Water Label – labelling system for the water efficiency of sanitary ware products.

Efficiency

Practical, attractive and perfect for continuous use

Practicality and efficient maintenance in public buildings are prime considerations in the development of new Villeroy&Boch products. The result: reliable and invisible solutions for toilets and urinals that simplify operation because the time and labour required for cleaning is reduced and the service life of the products extended. An inestimable advantage for all buildings in which efficiency and practicality are the order of the day.

The award-winning water-saving system.
AquaReduct

- Villeroy & Boch was one of the first to offer a 4.5 l toilet
- 1.5-litre water savings with the same high flushing performance (= savings of up to 25%)
- Villeroy & Boch offers one of the widest ranges of water-saving toilets in the industry
- Also suitable for retrofitting without special piping
- Received the environment prize of the Federation of German Industries (BDI); maximum number of points achieved: 4 LEED points

Urinal flush control via app.
ProDetect 2

- Suitable for use all over the world and water-efficient
- Automatic flush after use
- Stadium mode and 24 h hygiene flush
- Wireless remote diagnosis and function change through Bluetooth® interface
- Vandal-proof as all the technology is concealed behind the ceramic unit

The flexible toilet attachment system.
SupraFix 3.0

- Time-saving toilet installation from above by one person
- No visible screws, cover caps or fastening holes
- 2-in-1 installation of the toilet and toilet seat using the same holes
- More flexible positioning and precise alignment of the toilet seat as required by the customer

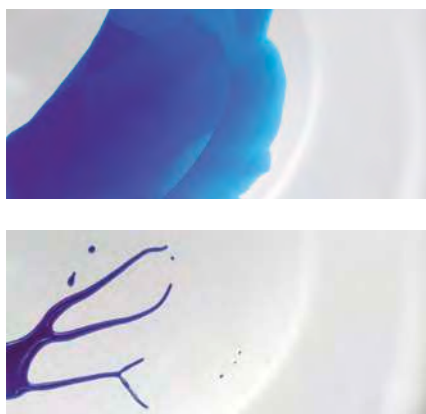

Fast replacement of siphon cartridge.
ViChange

- Siphonic urinals, ideal for public buildings
- Lower maintenance costs as the cartridge can be replaced in just 30 seconds, without having to remove the urinal from the wall
- Attractive ceramic outlet cover
- Fits various connection dimensions, height-adjustable outlet is ideal for renovated buildings

Hygiene

Minimum effort for maximum cleanliness

Stringent hygiene standards can be met either by thorough cleaning – or with the reliable hygiene solutions from Villeroy&Boch. From the rimless toilet to an antibacterial finish, Villeroy&Boch offers a variety of technologies to increase safety for guests, visitors and patients. For uncompromising cleanliness in the health sector and in every other building in which the highest level of hygiene is required.

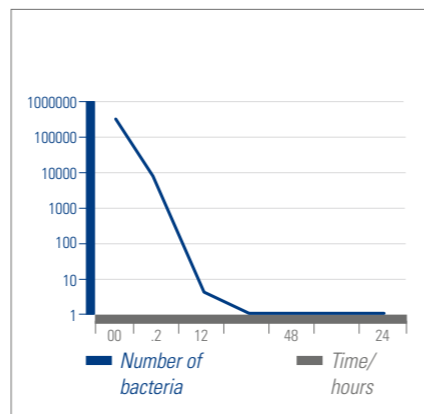

The dirt-repellent surface finish. CeramicPlus

- Non-stick effect prevents limescale deposits
- Permanently dirt-repellent and a brilliant sheen
- 80% less cleaning time*, 90% less cleaning agent*, 90% less water**
- Available for all sanitary ceramic products and all colours

The antibacterial glaze. AntiBac

- Has been proven to reduce the growth of bacteria by more than 99.9%***
- Available for ceramic surfaces and toilet seats
- Ideal for the strict hygiene standards in the commercial sector
- Can be combined with CeramicPlus and DirectFlush for optimum hygiene

Combined effect of AntiBac, DirectFlush and CeramicPlus in application test****

- Greater safety thanks to a combination of AntiBac, DirectFlush and CeramicPlus
- Multiple effect as important contribution to infection control in hospitals

* For the removal of limescale in comparison to standard Villeroy & Boch ceramics, wfk – Institut für Angewandte Forschung GmbH (wfk – Institute for Applied Research), WL 7478/15 dated 30 April 2015

** For the removal of slurry in comparison to standard Villeroy & Boch ceramics, wfk – Institut für Angewandte Forschung GmbH (wfk – Institute for Applied Research), WL 7478/15 dated 30 April 2015

*** Confirmed by the independent BOKEN Quality Evaluation Institute, the Federal Institute for Material Testing (BAM) in Berlin and IZORE Centrum Infectieziekten Friesland, NL

**** Standard household cleaning and rinsing

Toilet with skirting.

Rimless toilet, with ledge.

The generation of rimless toilets.

DirectFlush

- The inside of the bowl is flushed in its entirety without splashing
- Maximum flushing performance thanks to precise water flow
- Easy, fast cleaning thanks to rimless design
- Visible hygiene for the user, too
- Various models available: Compact, Standard, XL and Vita
- The broadest range of rimless toilets on the market

Internationalisation

Country-specific solutions directly from the flushing laboratory

Different countries have different standards and building regulations. To enable toilets to be used in international projects, the Villeroy&Boch laboratory carries out flushing tests in compliance with national building regulations for all kinds of objects – from golf balls to sawdust and pages from Australian telephone directories. The testing is not complete until the design and flushing complies with national standards, saving time and ensuring in this way that architects can plan with confidence.

International flushing volume requirements:

- | | | |
|---|---|--|
| 1. CSA Canada
6 litres + 4.8 litres | 6. NF France

Reliable planning

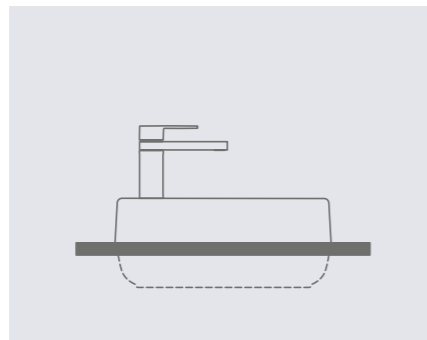

A fitting recommendation by Villeroy & Boch

Which taps are most suited to which washbasin to avoid splashing? At Villeroy&Boch architects can quickly find the right solution to ensure perfect functioning, right from the planning stage. Villeroy&Boch has tested its own tap fittings and the best-selling products of other manufacturers on Villeroy&Boch washbasins. The results of this extensive test series facilitate the choice of product considerably.

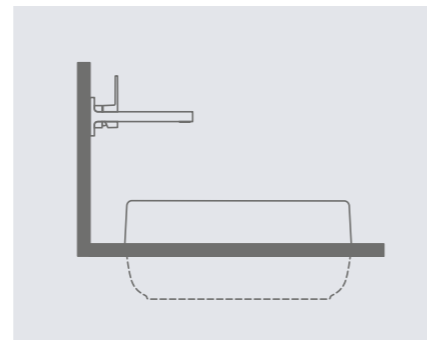

Washbasin and tap fitting alternatives:

Surface-mounted washbasin for tap fitting with raised base.

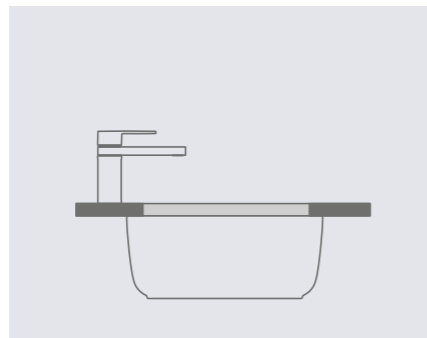

Built-in washbasin with single lever washbasin mixer.

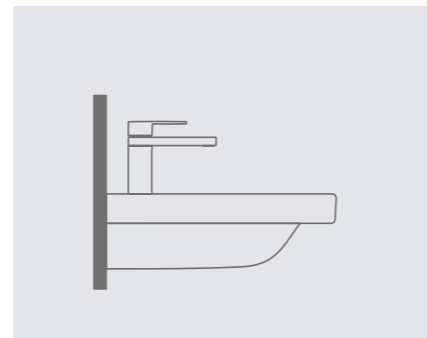

Built-in washbasin for wall outlet tap fitting.

Semi-recessed washbasin for tap fitting with single lever washbasin mixer.

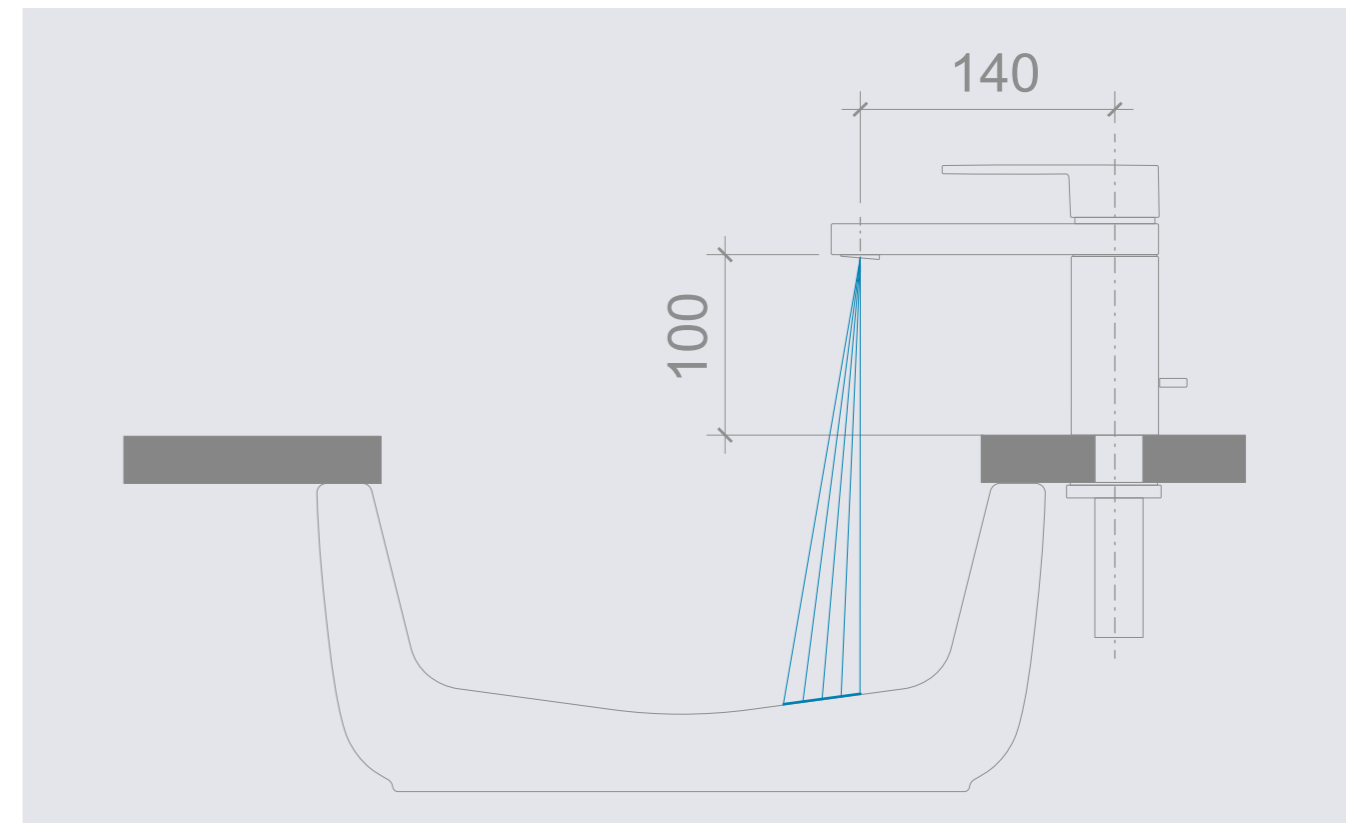

Undercounter washbasin with single lever washbasin mixer.

Wall-mounted washbasin with single lever washbasin mixer.

Where the water hits the basin – ideally just in front or behind the outlet valve depends on the height, projection and jet angle. As a rule: the shallower the basin, the greater the danger of splashing.

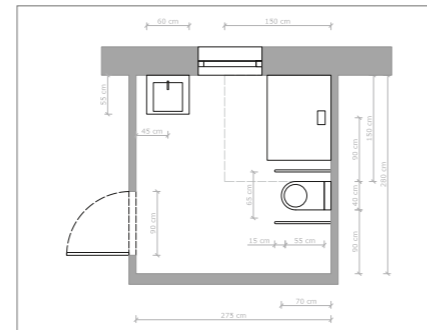

Accessible solutions

Modern aesthetics for contemporary living areas

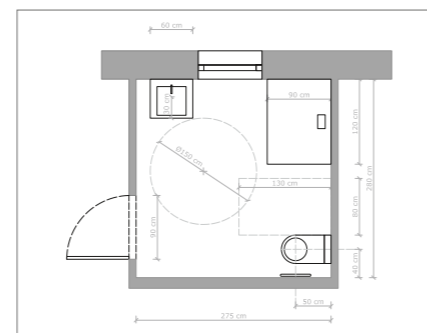

Accessible bathrooms should look elegant, too. Villeroy & Boch therefore offers a range of attractive products in different forms adapted right down to the last detail to the requirements, for example, of wheelchair users. And each and every one is designed in such a way that its special practicality is not immediately evident. This means that all users, regardless of their physical health or age, can now have their bathrooms designed as they wish.

Accessible solutions from Villeroy & Boch:

- O.novo Vita and Architectura Vita collections
- Wheelchair-compatible washbasins with more leg room and handles or grooves to facilitate pulling up a wheelchair and to provide support
- Raised toilet for retrofitting
- Elongated toilet makes it easier to transfer from the wheelchair to the toilet
- Floor-flush ceramic, Quarry® and acrylic shower trays
- Product and space compliance according to DIN 18040 for accessible design

According to German standard DIN 18040-1.

According to French standards NF P99-611 and NF P91-201.

Colours & Décors

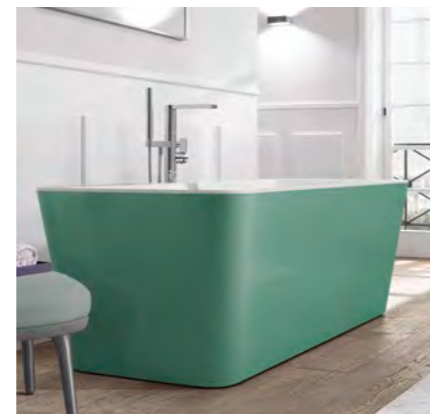

Fresh highlights for expressive bathroom concepts

Colours and décors influence the character of a room. They can be used in the bathroom to emphasize specific features, differentiate individual areas and create a pleasant atmosphere. Villeroy & Boch supports architects here with its expertise derived from decades of experience in the development of coloured ceramics and countless high-quality product solutions. Colours or décors add a special finishing touch to washbasins, shower trays and baths, turning them into aesthetic design features which broaden the available design scope for expressive bathroom concepts.

Artis washbasins

- 15 colours from 5 colour themes
- Colour concept by the designer Gesa Hansen
- Precise BiColour design with fine 1 mm rim

Colour on Demand

- Coloured panels for free-standing baths from 8 collections
- 15 colours from Gesa Hansen's colour concept
- Also available in many standard colour systems, such as PANTONE, Sikkens etc. (except metallic colours)

Colour concept by Gesa Hansen

Décors

- According to individual design
- Either on the inside or outside of the washbasins

Antheus "Art Décor" washbasin with platinum décor.

Loop & Friends washbasin by Marcel Wanders for Andaz Hotel in Amsterdam.

Educational construction

Child-friendly planning the easy way

Designing sanitary rooms for kindergartens entails special requirements with regard to ergonomics and functionality, safety and hygiene. All elements must be suitable for use by children of all ages without assistance and should encourage childrens' independence by means of appropriate forms and colours. O.novo Kids by Villeroy & Boch reconciles the needs of children, kindergarten staff, parents and the organisations that run pre-school facilities. The collection complies with the relevant guidelines for fitting out sanitary rooms at kindergartens, day nurseries and schools and has been developed specifically to provide architects with a reliable solution in planning such buildings.

Special features of O.novo Kids:

- Multiple washbasin with trap cover, sensor tap fitting and coloured single-lever washbasin mixer (Gustavsberg), floor-standing toilet for small children and wall-mounted children's toilet with seats in many variants, matching ViConnect installation system and coloured flush plates
- Developed in accordance with the latest scientific findings
- Products covering all age groups
- Modern, child-friendly design encourages childrens' independence
- Integrated hygiene solutions: rimless DirectFlush toilet, ceramics optionally available with dirt-repellent and anti-bacterial surface finishes
- Standard connections for simple installation

The first rimless children's wall-mounted toilet facilitates cleaning and enhances hygiene. Seat rings in 2 sizes and various colours offer safe support for all children.

At the washbasin with 3 different heights and depths, children intuitively go to the appropriate level and are encouraged to wash their hands on their own.

The floor-standing toilet for small children with a soft, ergonomic foam seat ring offers added safety and wellbeing at a height of 260 mm.

Bathroom furniture

Masterly craftsmanship

Villeroy & Boch sees bathroom furniture as an essential component of architecture. Furniture adds a harmonious finish to interior design through the quality of the materials, finishing and appearance. These aspects are typical of Villeroy & Boch furniture and can be seen in many of the collections.

All the bathroom furniture ranges at: pro.villeroy-boch.com

Special features of Villeroy & Boch bathroom furniture:

- A design language adapted to suit the ceramic products
- Use of environment-friendly raw materials and sustainable technologies such as LED light for mirrors, mirror cabinets and cabinet lighting
- Different internal arrangements of cabinets and drawers for practical convenience, e.g. adjustable glass or wood dividers, aluminium rails or accessory boxes
- Surface sealing to protect from moisture in the wet room
- Double-sided coating of rear walls
- Robust, metal hinges, electroplated for corrosion resistance
- Products made in Germany/Austria

Top quality finish right down to the smallest detail.

Made in Mondsee, Austria. A second production facility is located in Treuchtlingen, Germany.

Whirlpool systems

Noise reduction for added comfort

Modern bathrooms increasingly feature wellness components for massage or relaxation as standard. High-quality whirlpools need to offer much more than simple jet functions, however. The Villeroy & Boch whirlpool systems comply with DIN 4109 and, thanks to Whisper technology, are amongst the quietest available on the market.

All the whirlpool systems at: pro.villeroy-boch.com

Special features of Villeroy & Boch whirlpool systems:

- Three whirlpool systems: AirPool, Hydro-Pool and CombiPool, each in two versions (Entry-level and Comfort) and two additional CombiPools: Invisible and Active
- High planning reliability thanks to a choice of more than 70 baths that can be fitted with any whirlpool system
- Acrylic or Quaryl® baths ensure precise finishing
- Tested Whisper function for peaceful relaxation
- Underwater lighting or changing coloured lights in all models
- All products made in Europe

Flush-mounted nozzles for a smooth bath surface
the Invisible Jets extend automatically only when
needed.

Customised manufacturing and precision technol-
ogy made in Europe guarantee the highest quality
standards.

Tap fittings & Accessories

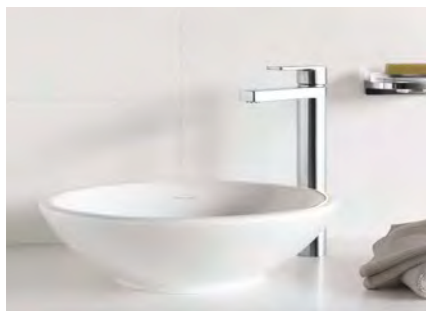

Stylish variety for contemporary architecture

Tap fittings determine the character of a bathroom and are the calling card, so to speak, of a washroom. Villeroy & Boch offers a wide selection of tap fittings to meet all possible planning requirements in terms of appearance, practicality and durability. In spite of heavy use, high-quality brass fittings ensure long-term sustainable use of water in the process.

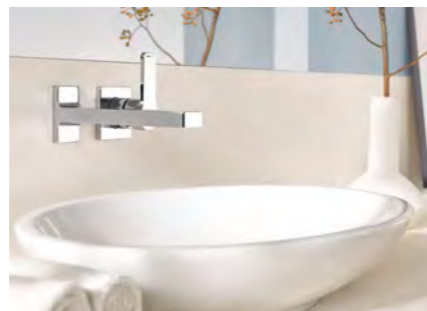

All the tap fitting ranges at: pro.villeroy-boch.com

Special features of Villeroy & Boch tap fittings:

- Sustainable solutions for reducing water consumption
- Plenty of scope for installation: surface-mounted and concealed installation; washbasin tap fittings of different heights; various 1-hole and 3-hole tap fittings; for wall-mounted or floor-standing installation; for all washbasin, bidet, shower or bath applications
- Chrome-plating for resistance to scratching and mechanical stress
- Alternative finishes: from the exclusive "Champagne" gold finish, handles made of crystal glass or porcelain to the classic cross handle
- Customised solutions with special finishes and colours are possible

Different versions offer flexibility and scope for integrated architectural design.

A top quality finish ensures a long service life even when the tap fittings are subjected to heavy use.

Tiles

Consummate interior design

Ceramic tiles are the perfect choice wherever robust and attractive wall and floor coverings are required – particularly in public and semi-public projects. They offer high load-bearing capacity, a firm footing, efficient cleaning and help to create aesthetically appealing interiors. The tile concepts from Villeroy & Boch meet the requirements of international project business. In numerous formats, colours and surface finishes they open up a broad range of design options and tick all the boxes for sustainable projects in compliance with the relevant standards.

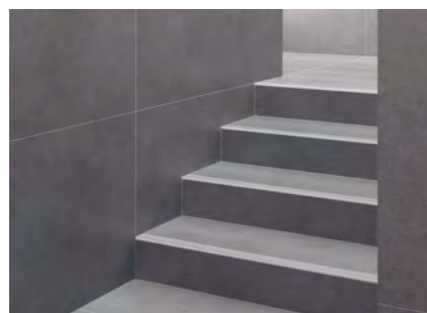

All the tile ranges at: pro.villeroy-boch.com

Special features of Villeroy & Boch tiles:

- Inspiring décor variety for interior and outdoor applications
- Outdoor tiles of 2 cm in thickness in selected décors and various formats
- Standardised slip-resistance classes for use in public and private areas
- Accessible construction with high-tech tiles and functional trims
- Unique ceramic articles from digital prints to hand-crafted mosaics are available as part of the special Artefactor service
- Planning support from our own architects and interior designers
- The tiles meet all sustainable building requirements. V&B Fliesen GmbH is EMAS-validated, the processes and procedures are certified in accordance with DIN EN ISO 9001.
- The resource-conserving and environmentally compatible production processes have been awarded the EPD label by the "Institut für Bauen und Umwelt e.V.".

The Artefactor department offers an individual, aesthetic and creative service, producing tiles to customers' specifications for specific projects.

The product range also includes stair tiles with milled grooves as edge markings, up to the large size of 30 x 120 cm.
