Our Camberwell furniture collection is a wall-hung unit with a choice of three sizes and four colours. A simple but stylish design, Camberwell offers you a sophisticated storage unit with a choice of an elegant handle design in three finishes to ensure your furniture matches the rest of your bathroom.

Size

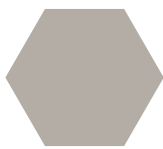

The Camberwell unit is available in three sizes; 600mm, 800mm and 1000mm all in a double drawer configuration, offering you a choice of sizes that work for your bathroom.

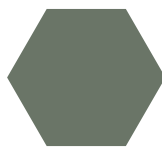

Dusty Blue

Frosted White

Warm Beige

Earthy Green

Colour

Choose from four luxurious colours in a Matt finish; Warm Beige, Dusty Blue, Frosted White and Earthy Green. All designed to make an impact in your space.

Worktop

A Carrara marble effect worktop option is available to pair with your Camberwell unit across all three sizes. Pair this stunning worktop with a choice of countertop basins to make a real impact in your bathroom.

Carrara White

Drawers

Camberwell drawers are constructed from solid wood and operate a soft-close pull to open effect with a full extension making them easier to access inside. The top drawer has a cut out for waste services and drawers have a two-way adjustment, both horizontally and vertically. The furniture units also include a drawer base lock which prevents accidental jumping off the runners. They have a 25kg weight capacity and each of the three units are designed as a double-drawer option with radius edged drawer fronts creating a softer more stylish appearance.

Countertop Basins

You can choose from any of our countertop basins, see page 55, which can be paired with the Carrara marble effect worktop.

Cast Marble Basin

To create your preferred aesthetic, you can opt for an integrated cast marble basin in either of the three sizes in a softly shaped design. These basins are produced from mineral composite and are 75% dolomite stone and 25% resin bonders which produce a basin with outstanding durability and high resistance to thermal and impact shock. External surfaces are covered with Nano coat which is also used to coat the surface of yacht hulls and wind turbine blades. The high gloss white finish is as close as is possible to the white of our WCs.

Handle Options

Camberwell has a choice of three handle finishes; Chrome, Matt Black and Brushed Brass. These simple but elegant handles can be purchased separately to coordinate with your brassware and accessories in your chosen bathroom scheme.

Wall Hanging System

The Camberwell furniture units have a 70kg weight capacity on a solid wall with concealed fittings to enhance the look and feel. The units have a three-way adjustment - up, down and sideways and confirm to BS EN 15939 (strength, durability and load testing).

Furniture Carcass

The Camberwell furniture units are supplied fully assembled and ready to fit. The units are produced from recycled materials with all wood materials PEFC compliant and all edges use PU adhesive for greater resistance against humidity in the bathroom. Each come with a 16mm vanity carcass and 19mm drawer front with drawers calibrated at the factory during the quality checks.

The bath is the largest single item in your bathroom, so it has to be right. Britton offers a wide selection to choose from, in a wide range of designs, shapes and sizes to suit your space perfectly.

ClearStone Baths

All of our ClearStone baths make a stunning feature in the bathroom, benefiting from features such as:

- Crafted from ClearStone material for delicate rims and a softer profile
- Scratch resistant and hard-wearing
- All British and European performance standards when installed in line with our instructions

Acrylic Baths

All of our acrylic baths utilise high quality materials throughout including:

- Only 3mm LUCITE™ acrylic sheet for the bath moulding, a leading material which is naturally slip-resistant
- Floor-mounted leg fixings which provide a stable base and are adjustable to cope with uneven floors
- Manufactured from 30% recycled material

Range

We classify our baths into their design styles:

Single ended baths have the backrest at one end and the taps opposite.

Double ended baths have a backrest at both ends with the taps in the centre of the long side.

Unique baths - The Patinato back-to wall and Viride offset are designed for those wanting a real showstopper in their bathroom.

Design

We design all our baths to maximise comfort while in use. Our bath rims are designed to be narrower than other producers, to maximise internal space while retaining a smaller footprint.

Option 2

Level to the floor

The low 35mm height allows the tray to be sunk into the floor so that the upper surface is level with the floor. The framed rim still allows good water retention to avoid water escape.

Option 3

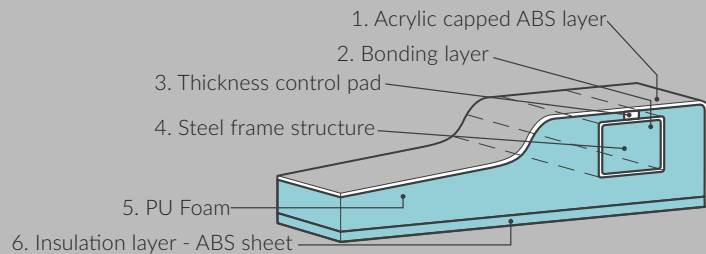

Raised above the floor

Zamori offers optional adjustable legs and panel sets for raising the tray 100mm above the floor. The packs include removable acrylic side panels to match the shower tray. These are held in place by magnetic clips to ensure maintenance is easy.

Reinforced trays

All our trays are manufactured from Acrylic sheet and incorporate our patented steel reinforcing frame. This is formed to be the exact shape of each tray and ensures rigidity for a lifetime of use. The trays are flat on the under-surface; this makes installation and levelling very easy.

Anti-bacterial

All Zamori shower trays are impregnated with an anti-bacterial zeomic agent.

One of the amazing qualities of silver is that it has inherent anti-microbial properties - Zamori has added the silver-based anti-bacterial additive Zeomic into the manufacturing process. The anti-microbial qualities protect against harmful bacteria and suppresses mould growth.

- 1) The silver ions from Zeomic impregnate the microbe surface and are then absorbed by the cells through active transfer.
- 2) The silver ions react with several metabolic enzymes within the metabolic system of the microbes.
- 3) The activity of these enzymes is hindered and the growth of microbes is inhibited.

Anti-slip

Zamori anti-slip is simply the finest available.

Our anti-slip trays comply with DIN51097 class C - the highest anti-slip rating.

We are the only manufacturer to thermo bond the Swiss Grip Antislip onto the tray with a curing process - to ensure better performance for a cleaner and longer lasting surface.

DIN51097 class C anti-slip ramp test.

Vortex turbo waste

Our shower waste is a 90mm diameter high flow Vortex Turbo waste designed to fit all our trays. This ensures that the water flows out at up to 30 litres per minute.

The waste incorporates an easy-clean removable filter to capture any hair or other objects to remove the risk of blocking.

The waste is supplied with a solvent weld adaptor for different waste pipe sizes.
